

Subject Index of Vol. 138

Alloys

- a critical assessment of the θ projection concept for creep life prediction of nickel-based superalloy components, 213
- cyclic hardening and substructure of Al-Mg alloys, 49
- decomposition of dilute Ni-Ti alloys studied by high resolution X-ray diffractometry, 147
- effect of electric field on cavitation in superplastic aluminum alloy 7475, 247
- fracture mechanisms of fiber-reinforced titanium alloy matrix composites. Part I: Interfacial behavior, 155
- fracture mechanisms of fiber-reinforced titanium alloy matrix composites. Part II: Tensile behavior, 169
- fracture mechanisms of fiber-reinforced titanium alloy matrix composites. Part III: Toughening behavior, 181
- frequency effects on fatigue crack growth behavior in a near- α titanium alloy, 69
- new constitutive equation for two-phase superplastic titanium alloys, 221
- on the thermodynamic driving force for diffusion-induced grain boundary migration, discontinuous precipitation and liquid film migration in binary alloys, 133
- the effect of microstructure on the mechanical behavior and fracture mechanism in a 7050-T76 aluminum alloy, 275
- tribology of Al-Si alloy-graphite composites: tribologically induced graphite films and the role of silicon morphology, 123

Aluminium

- 1000-1300 K slow strain rate properties of NiAl containing dispersed TiB₂ and HfB₂, 83
- cyclic hardening and substructure of Al-Mg alloys, 49
- effect of electric field on cavitation in superplastic aluminum alloy 7475, 247
- investigation of room- and elevated-temperature fatigue crack growth in Ti-48Al, 95
- strain rate sensitivity effects with forming characteristics of superplastic Ti-6Al-4V, 205
- the effect of microstructure on the mechanical behavior and fracture mechanism in a 7050-T76 aluminum alloy, 275
- the fracture mode in SiC-Al composites, 227
- tribology of Al-Si alloy-graphite composites: tribologically induced graphite films and the role of silicon morphology, 123

Boron

- 1000-1300 K slow strain rate properties of NiAl containing dispersed TiB₂ and HfB₂, 83

Carbon

- the fracture mode in SiC-Al composites, 227

Ceramics

- response of whisker-reinforced ceramic matrix composites to dynamic compressive loading, 63

Chromium

- effects of dwell time on the creep damage generated in AISI type 347 weld and 1CrMoV steel during creep fatigue loading, 103

Composites

- fracture mechanisms of fiber-reinforced titanium alloy matrix composites. Part I: Interfacial behavior, 155
- fracture mechanisms of fiber-reinforced titanium alloy matrix composites. Part II: Tensile behavior, 169
- fracture mechanisms of fiber-reinforced titanium alloy matrix composites. Part III: Toughening behavior, 181
- response of whisker-reinforced ceramic matrix composites to dynamic compressive loading, 63
- the fracture mode in SiC-Al composites, 227
- tribology of Al-Si alloy-graphite composites: tribologically induced graphite films and the role of silicon morphology, 123

Copper

- dynamic deformation of shock prestrained copper, 23

Crack growth

- frequency effects on fatigue crack growth behavior in a near- α titanium alloy, 69
- investigation of room- and elevated-temperature fatigue crack growth in Ti-48Al, 95

Crack initiation

- fatigue damage accumulation in nickel prior to crack initiation, 191

Crack propagation

- threshold and effective threshold of fatigue crack propagation in ARMCO iron. I: The influence of grain size and cold working, 1
- threshold and effective threshold of fatigue crack propagation in ARMCO iron. II: The influence of environment, 15

Creep

- a critical assessment of the θ projection concept for creep life prediction of nickel-based superalloy components, 213

- effects of dwell time on the creep damage generated in AISI type 347 weld and 1CrMoV steel during creep fatigue loading, 103

Cyclic hardening

- cyclic hardening and substructure of Al-Mg alloys, 49

Damage

- fatigue damage accumulation in nickel prior to crack initiation, 191

Deformation

- a study of shear deformation and work hardening of metals under pressures to 2100 MPa, 33

- dynamic deformation of shock prestrained copper, 23

Discontinuous precipitation

- on the thermodynamic driving force for diffusion-induced grain boundary migration, discontinuous precipitation and liquid film migration in binary alloys, 133

Fatigue

- effects of dwell time on the creep damage generated in AISI type 347 weld and 1CrMoV steel during creep fatigue loading, 103
- fatigue damage accumulation in nickel prior to crack initiation, 191
- frequency effects on fatigue crack growth behavior in a near- α titanium alloy, 69
- investigation of room- and elevated-temperature fatigue crack growth in Ti-48 Al, 95
- threshold and effective threshold of fatigue crack propagation in ARMCO iron. I: The influence of grain size and cold working, 1
- threshold and effective threshold of fatigue crack propagation in ARMCO iron. II: The influence of environment, 15

Fibers

- fracture mechanisms of fiber-reinforced titanium alloy matrix composites. Part I: Interfacial behavior, 155
- fracture mechanisms of fiber-reinforced titanium alloy matrix composites. Part II: Tensile behavior, 169
- fracture mechanisms of fiber-reinforced titanium alloy matrix composites. Part III: Toughening behavior, 181

Fracture

- fracture mechanisms of fiber-reinforced titanium alloy matrix composites. Part I: Interfacial behavior, 155
- fracture mechanisms of fiber-reinforced titanium alloy matrix composites. Part II: Tensile behavior, 169
- fracture mechanisms of fiber-reinforced titanium alloy matrix composites. Part III: Toughening behavior, 181
- the effect of microstructure on the mechanical behavior and fracture mechanism in a 7050-T76 aluminum alloy, 275
- the fracture mode in SiC-Al composites, 227

Grain boundary migration

- on the thermodynamic driving force for diffusion-induced grain boundary migration, discontinuous precipitation and liquid film migration in binary alloys, 133

Graphite

- tribology of Al-Si alloy-Graphite composites: tribologically induced graphite films and the role of silicon morphology, 123

Hafnium

- 1000-1300 K slow strain rate properties of NiAl containing dispersed TiB₂ and HfB₂, 83

Inorganic materials

- dimensional-structural relationships of the strength of two-phase polycrystalline inorganic materials, 109

Interfaces

- fracture mechanisms of fiber-reinforced titanium alloy matrix composites. Part I: Interfacial behavior, 155

Iron

- threshold and effective threshold of fatigue crack propagation in ARMCO iron. I: The influence of grain size and cold working, 1
- threshold and effective threshold of fatigue crack propagation in ARMCO iron. II: The influence of environment, 15

Liquid film migration

- on the thermodynamic driving force for diffusion-induced grain boundary migration, discontinuous precipitation and liquid film migration in binary alloys, 133

Magnesium

- cyclic hardening and substructure of Al-Mg alloys, 49

Metals

- a study of shear deformation and work hardening of metals under pressures to 2100 MPa, 33

Microstructure

- the effect of microstructure on the mechanical behavior and fracture mechanism in a 7050-T76 aluminum alloy, 275

Molybdenum

- effects of dwell time on the creep damage generated in AISI type 347 and 1CrMoV steel during creep fatigue loading, 103

Nickel

- 1000-1300 K slow strain rate properties of NiAl containing dispersed TiB₂ and HfB₂, 83
- a critical assessment of the θ projection concept for creep life prediction of nickel-based superalloy components, 213
- decomposition of dilute Ni-Ti alloys studied by high resolution X-ray diffractometry, 147
- fatigue damage accumulation in nickel prior to crack initiation, 191

Polycrystals

- substrate evolution and flow behaviour of AISI 316L stainless steel polycrystals at room temperature, 237

Shock

- dynamic deformation of shock prestrained copper, 23

Silicon

- the fracture mode in SiC-Al composites, 227
- tribology of Al-Si alloy-graphite composites: tribologically induced graphite films and the role of silicon morphology, 123

Steels

- phase embrittlement of a type 310 stainless steel, 259
- development and properties of tungsten-bearing stainless maraging steels, 267
- effects of dwell time on the creep damage generated in AISI type 347 weld and 1CrMoV steel during creep fatigue loading, 103
- substrate evolution and flow behaviour of AISI 316L stainless steel polycrystals at room temperature, 237

Strain

- 1000-1300 K slow strain rate properties of NiAl containing dispersed TiB₂ and HfB₂, 83
- strain rate sensitivity effects with forming characteristics of superplastic Ti-6Al-4V, 205

Structure

- dimensional-structural relationships of the strength of two-phase polycrystalline inorganic materials, 109

Substructure

- cyclic hardening and substructure of Al-Mg alloys, 49

Superplastics

- effect of electric field on cavitation in superplastic aluminum alloy 7475, 247

new constitutive equation for two-phase superplastic titanium alloys, 221

strain rate sensitivity effects with forming characteristics of superplastic Ti-6Al-4V, 205

Tensiles

fracture mechanisms of fiber-reinforced titanium alloy matrix composites. Part II: Tensile behavior, 169

Thresholds

threshold and effective threshold of fatigue crack propagation in ARMCO iron. I: The influence of grain size and cold working, 1

threshold and effective threshold of fatigue crack propagation in ARMCO iron. II: The influence of environment, 15

Titanium

1000–1300 K slow strain rate properties of NiAl containing dispersed TiB_2 and HfB_2 , 83

decomposition of dilute Ni-Ti alloys studied by high resolution X-ray diffractometry, 147

fracture mechanisms of fiber-reinforced titanium alloy matrix composites. Part I: Interfacial behavior, 155

fracture mechanisms of fiber-reinforced titanium alloy matrix composites. Part II: Tensile behavior, 169

fracture mechanisms of fiber-reinforced titanium alloy matrix composites. Part III: Toughening behavior, 181

frequency effects on fatigue crack growth behavior in a near-titanium alloy, 69

investigation of room- and elevated-temperature fatigue crack growth in Ti-48Al, 95

new constitutive equation for two-phase superplastic titanium alloys, 221

strain rate sensitivity effects with forming characteristics of superplastic Ti-6Al-4V, 205

Tribology

tribology of Al-Si alloy-graphite composites: tribologically induced graphite films and the role of silicon morphology, 123

Tungsten

development and properties of tungsten-bearing stainless maraging steels, 267

Vanadium

effects of dwell time on the creep damage generated in AISI type 347 weld and 1CrMoV steel during creep fatigue loading, 103

strain rate sensitivity effects with forming characteristics of superplastic Ti-6Al-4V, 205

Work hardening

a study of shear deformation and work hardening of metals under pressures to 2100 MPa, 33

X-ray diffractometry

decomposition of dilute Ni-Ti alloys studied by high resolution X-ray diffractometry, 147
